

# Are *You* Supporting a Nuclear Iran?

What if you could protect America and our allies from nuclear weapons with your choices at the grocery store...the mall? Would you do it? What if you could make the world safer with the car you drive and the gas you put in it? Would you? United Against Nuclear Iran will make it easy with a website that lists all the international companies that do business in Iran - businesses that are making it easier for Iran to pursue its nuclear ambitions.

The **Iran Business Registry** is a compilation of those countries and corporations that continue to sustain the Iranian economy while the international community seeks to sanction Iran for its defiance of international law and U.N. Security Council Resolutions.

Visit [www.unitedagainstnucleariran.com](http://www.unitedagainstnucleariran.com)  
to see the complete list.

It's time for companies and countries to stop doing business with Iran.
